

Polybut Bulk Packaging

Polybut & Polybut HR Product Series

- **Polybut** Low Molecular Weight Polybutenes (Conventional PIB)
- **Polybut HR** Low Molecular Weight Polyisobutenes (High Reactive PIB)

Kemat Polybut and Polybut HR product series are available in bulk packaging. To maximise flexibility and to meet the specific requirements of its customers, Kemat presents four bulk packaging options, all available within short lead times

Steam Heated ISO Tank

- Typical payload 20 mt
- Delivery temperature Up to 120 °C
- Features Minimal tank insulation, most significant temperature drop during transport
- Recommended for Short-range transport to customer silo or long-range transport to heating station nearby customer

Glycol Heated ISO Tank

- Typical payload 20 mt
- Delivery temperature Up to 120 °C
- Features Additional glycol insulation reduces temperature drop during transport
- Recommended for Medium- and long-range transport to customer silo or long-range transport to heating station nearby customer

Electric Heated ISO Tank

- Typical payload 20 mt
- Delivery temperature Up to 140 °C
- Features Build-in heating equipment powered by generator guarantees customer specified temperature throughout transport and upon delivery, no heating station required
- Recommended for Medium- and long-range transport to customer silo

Rental Electric Heated ISO Tank & Chassis

- Typical payload 20 mt
- Operation temperature Up to 140 °C
- Features ISO Tank with or without chassis for rent on customer site
- Recommended for Low-cost intermediate storage solution with flexible build-in heating equipment which can be powered by a simple connection to the customer electric circuit

Detailed specifications of the Kemat bulk equipment are available upon request
